WORK EXPERIENCE

Data Quality Analyst & Taxonomy SME

October 2024 — Present

Experis @ Meta

- Utilized Python and SQL to analyze large-scale annotation datasets, visualize trends with charting libraries, and deliver weekly actionable reports/insights to stakeholders—driving optimizations across LLM training pipelines, product features, and marketing notification systems, while uncovering multimillion-dollar revenue leakage.
- Led comprehensive vendor trainings and workflow standardization using Meta’s proprietary annotation and QA technologies, significantly improving consistency, data accuracy, and quality across global distributed teams supporting AI/ML models.
- Served as ad-hoc Taxonomy Subject Matter Expert: built and refined scalable content labeling taxonomies, facilitated recurring cross-functional stakeholder alignment meetings, and contributed to ethical data practices and prioritization roadmaps.
- Authored and maintained detailed technical documentation, SOPs, workflow guidelines, self-serve guides, and internal resources for third-party vendors and Meta engineering/product teams—reducing onboarding friction and support overhead.
- Developed AI-assisted internal Meta Spaces to structure complex topics for improved human-AI collaboration, enhancing training data quality, usability, and downstream model learning outcomes.
- Conducted analytical QA tests and audits on vendor-provided annotations, enforcing rigorous data quality standards and identifying discrepancies for remediation.

Software Engineer Intern

May 2024 — September 2024

iHeartMedia

- Spearheaded migration from legacy RESTful APIs to a modern GraphQL schema, dramatically improving frontend data-fetch performance, query flexibility, and long-term maintainability for audio playout services.
- Architected and maintained scalable, fault-tolerant AWS infrastructure (Lambda, S3, EC2) to support high-availability playout delivery with automated monitoring and recovery mechanisms.
- Collaborated daily in Agile/SCRUM sprints alongside frontend engineers, UX/UI designers, and product managers to define technical requirements, iterate on features, and ship user-facing enhancements.
- Authored comprehensive developer-facing technical documentation—including new API guides, troubleshooting checklists, integration examples, and onboarding materials—accelerating ramp-up for new engineers and reducing support tickets.
- Debugged JavaScript/TypeScript runtime issues using Chrome DevTools, improving application stability and performance during rapid feature iterations.

Medical Claim Analyst

January 2023 — May 2023

United Healthcare Group

- Processed and adjudicated over 500 medical claims per day in strict compliance with Medicare/Medicaid policies, performing detailed root-cause analysis on discrepancies to resolve errors and ensure accurate payment reconciliation.
- Generated compliance reports, KPI dashboards, and audit-ready documentation to support internal reviews and drive continuous workflow improvements.

Medical Data Entry Clerk

June 2022 — December 2022

American Medical Response

- Executed high-volume, high-accuracy data entry (360–1,000 Medicaid claims/day) while maintaining strict HIPAA compliance and data security standards.
- Developed and implemented standardized checklists and templates that reduced processing errors by 15% and improved overall team efficiency.

EverGroove Studio

- Designed and executed multi-platform content strategies (Facebook, Twitter, Instagram, YouTube), leveraging data analytics to drive a 10% increase in qualified sales leads.
- Monitored engagement metrics with Google Analytics and platform tools; delivered data-driven recommendations to optimize posting cadence, content types, and audience targeting.

SKILLS

Languages | JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frontend & Frameworks | React, Tailwind CSS, GraphQL, REST APIs, Responsive Design

Testing & Quality | Manual QA, Data Auditing, Debugging (Chrome DevTools), SQL Postman

Tools & Infrastructure | Git/GitHub, AWS (S3, EC2, Lambda), Relational Databases (PostgreSQL/MySQL), Agile/SCRUM, Adobe Suite

Documentation & Communication | Technical Writing (API Guides, SOPs, Self-Serve Docs), UX Writing, Content Strategy, SEO, Stakeholder Reporting & Presentations

Concepts | API Integration & Migration, Data Analysis & Visualization, Accessibility (WCAG), CI/CD Basics, Vendor Workflow Optimization, Ethical Data Practices

SOFTWARE WORK

Portfolio (Personal) | [Repo](#) | [Development](#)

Tech

Frontend: Next.js (React framework) → TypeScript → Tailwind CSS (with Shadcn/UI components)

Backend/ Data: Prisma (ORM)

Deployment: Vercel

Genre Q (Personal Project) | [Repo](#) | [Development](#) | [WireFrame](#)

Tech

Frontend: React, React Router, Swiper

Testing: Cypress

Deployment: Vercel

EDUCATION

Turing School of Software and Design, Remote May 2023 — March 2024 ACCET Software Engineering Certificate — Front End Engineering

- Voted to Student Leadership Committee | 1,500+ Hours Hands-On Coding | Project-Based Learning | 4.0 GPA

University of MSU Denver, Denver, CO January 2016 — December 2021 Bachelor of Science in Technical Communications — Digital Media | Minor in Video Production | Provost Honor Roll | 3.9 GPA

Google Data Analytics Professional Certificate Coursera | Jan – Feb 2022

Microsoft Certified: Azure AI Fundamentals In Progress
